

PTaP Expert Response Key

The PTA is a perceptions instrument, and many questions measure students' interest in becoming a grade 7-12 teacher. As such, expert responses are those that align with the views of a student who is interested in becoming a teacher and who has accurate information about the teaching profession. Furthermore, this student's environment (friends, family, university department, etc.) would be supportive of this student becoming a teacher. Note that some questions (e.g. 19) are multiple choice rather than agree/disagree.

A = Experts agree or strongly agree

D = Experts disagree or strongly disagree

N = There is no expert consensus response
